

VeggieTales

TIC-TAC TWICE

PLAYERS: 2 - Ages 5 & up!

CONTENTS: 2 Veggie Tic-Tac Twice Game Boards,
32 Game Tokens: 16 Yellow, 16 Green, Rules.

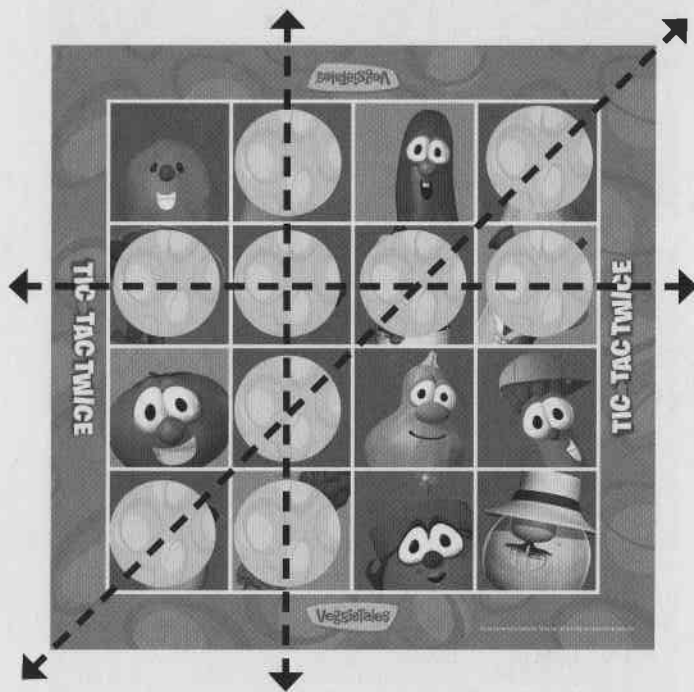

OBJECTIVE: To be the first to place **four** of your color tokens in a straight line—either across, up-and-down or diagonally.

SET UP: Each player chooses a token color AND places a game board in front of them. (It's best that players sit across from each other.)

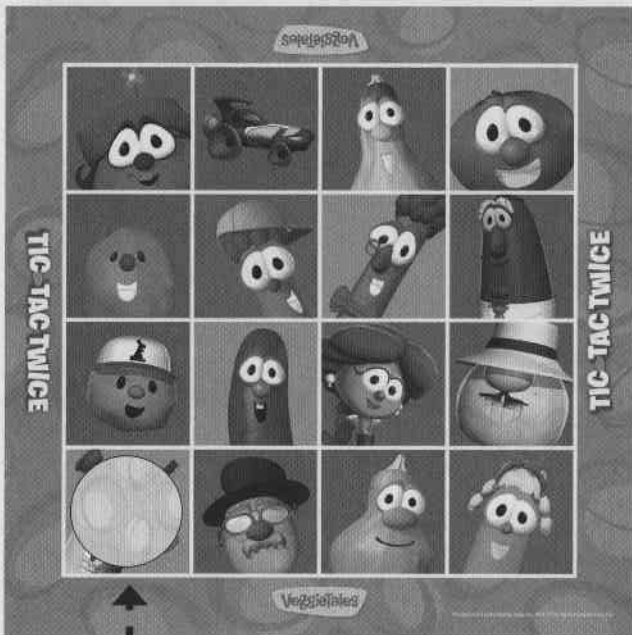

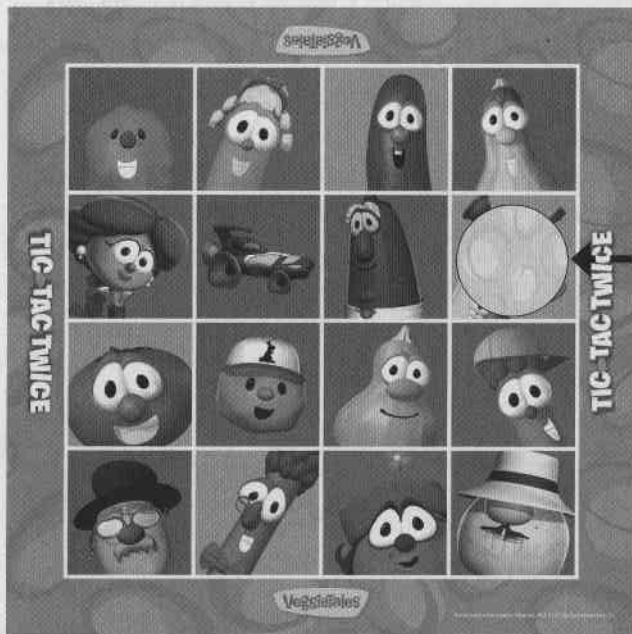

HOW TO PLAY: Play begins with the youngest player choosing a character space and placing their color tokens on the same Veggie character space on BOTH

game boards. (i.e., placing a yellow token on Larry Boy picture found on each of the two boards. See other side.)

Players continue alternating turns. When a player positions three of their color tokens in one row on one of the game boards, they must call out **"check."** The opponent then can **"block"** the line by placing one of their color tokens on the fourth space. Play continues until a player positions four of their color tokens in a straight line. **NOTE:** If you have the choice of winning or blocking your opponent's row you can go for the win!

WINNING THE GAME: The first to place **four** of their color tokens in a **straight line—either across, up-and-down or diagonally WINS!**

EXAMPLE:

A single turn allows a player to lay TWO of their tokens: one on each matching Veggie character they choose. In the example to the left, the player has chosen the "Larry Boy" character space and places their tokens accordingly. NOTE: The matching space is NOT in the same location on both boards. This is what makes Tic-Tac Twice so great!
